THE TOWN AND COUNTRY PLANNING ACT 1990  
COUNTY MATTER MINERAL APPLICATION

**Application Number:** WSCC/063/13/BA  
**Location:** Lower Stumble Hydrocarbon Exploration Site, London Road, Balcombe, Haywards Heath, West Sussex, RH17 6JH  
**Proposal:** Amendment of condition 3 of WSCC/027/10/BA to vary the type of flare used during the testing process  
**Applicant:** Cuadrilla Resources Limited

Dear Sir

Thank you for your letter, dated 2nd July, inviting this Council to comment on the above proposal.

Clearly the proposed enclosed ground flare, being 13.72 metres high, will be far more visually intrusive than the original consented ground flare.

However if the proposed equipment does not increase the emissions into the atmosphere (hopefully reduces them) and/or create any greater light or sound pollution (hopefully less) then this Council will not oppose the proposal.

But if the emissions and/or the light or sound pollution will be increased as a consequence of the proposal then this Council will strongly oppose it. It requests that you satisfy yourself that none of these increases will occur before allowing the proposed change.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Alison Stevenson'.

Alison Stevenson
